

Additional Request: Contribute to CAOT's IEOT Resource Development

The Canadian Association of Occupational Therapists (CAOT) is leading a new national initiative — the *Internationally Educated Occupational Therapists: Web-Based Navigation Supports* project — funded by Health Canada's Health Care Policy and Strategies Program (HCPSP). This project will create online tools and resources to help internationally educated occupational therapists (IEOTs) navigate the licensure process and successfully join Canada's occupational therapy workforce.

To help shape this work, CAOT will soon launch a survey to hear directly from IEOTs and key partners — including employers, supervisors, clinical leads, and mentors. Your feedback will ensure the resources developed are practical, meaningful, and truly meet the needs of those they're designed to support.

Learn more and share your insights by visiting CAOT's [IEOT webpage](#) or emailing ieot@caot.ca.
